

The Kaseya® K-12 Education Bundle

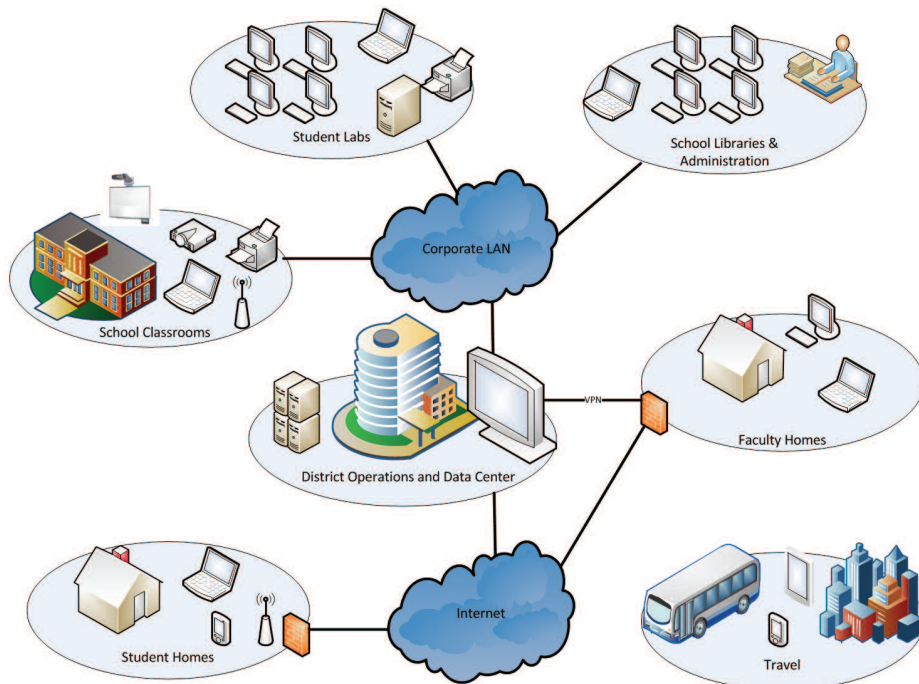

Do more. Do it better. Do it with less.
All at a price you can afford.
Exclusively offered by Kaseya.

Today's K-12 education organizations face a "perfect storm" of problems. First, there are an increasing numbers of services, students, and IT resources to manage. Second, expectations are that the existing services and resources will be continually optimized better than they were previously. Finally, the budgets are shrinking crippling efforts to accomplish these goals.

The Kaseya K-12 Education solution helps you weather the perfect storm in three major ways:

- Provide **out of the box best practices** for K-12 organizations. Kaseya has been working closely with a significant number of K-12 organizations on business process re-engineering and IT automation. We've taken the best practices from these organizations and included them into this solution and will continue to evolve and expand the solution over time. These best practices will help you optimize the application of your IT resources to the highest possible business value.
- Provide **special pricing** for the education K-12 market. We understand the budget crunch and the sensitive nature of your current budgets. We have created a pricing structure to help meet those needs.
- Join forces online with other industry experts with **the Kaseya community**. Ask questions and learn to maximize your ROI.

Kaseya Supported Topologies for Schools

Kaseya Differentiators

- The only K-12 specific solution

The Kaseya Solution

The Kaseya K-12 Education Bundle is the only automated IT systems management solution specifically built for K-12 schools. All of this at a price you can't afford to miss.

The full Kaseya Solution also contains other add-on modules which can be bolted into your same deployment solution providing a single integrated solution.

* Components available as add-ons to the bundle

Who is Kaseya?

Kaseya is a global provider of IT management software for IT Solution Providers and Public and Private Sector IT organizations. For Managed Service Providers, we are the number one software solution with over 10,000 customers.

As a privately held software company with global presence, Kaseya emerged in 2000 with a vision to build a new type of remote management solution. The idea for the Kaseya solution was born when our founders brought together their years of experience in the networking, security and desktop worlds. This confluence of experience gives us a unique knowledge of the technologies required to develop a comprehensive solution based on a solid understanding of the customer problems associated with implementing, managing and securing the network.

About Kaseya

Kaseya is the leading global provider of IT Systems Management software. Kaseya solutions empower virtually everyone — from individual consumers to large corporations and IT service providers — to proactively monitor, manage and control IT assets remotely, easily and efficiently from one integrated Web-based platform.
