

***SIMPLE, DIRECT-TO-CLOUD
PROTECTION FOR REMOTE
WORKSTATIONS AND
FILE SERVERS***

SECURE ENDPOINT BACKUP FROM ANYWHERE

Kaseya makes efficient and reliable backup and recovery as effortless and hassle-free as possible. Built keeping busy IT administrators in mind, Kaseya EndPoint Backup provides a simple and cost-efficient way of protecting and securing files and folders on laptops, PCs and other endpoints connected to the corporate network.

CLOUD BACKUP FOR EVERYONE AND EVERY SERVER

Don't ignore the backup needs of your endpoints and file servers. Now you can protect all files and folders in your distributed environment without the hassle of setting up an appliance or providing local storage at every office location. Kaseya EndPoint Backup is the simplest way to back up from anywhere with internet connectivity — including Wi-Fi — to protect endpoints and file servers regardless of their location. To get started, simply download an agent to your Windows machines or use your favorite endpoint management software to push agents to your fleet. You can then start backing up right away.

HANDS-OFF PROTECTION FOR WINDOWS WORKSTATIONS AND SERVERS

Once deployed, Kaseya EndPoint Backup automatically backs up endpoint data to the secure Kaseya Cloud. No additional touches or IT management is required until data needs to be recovered, making it fast and easy.

Secure Cloud Protection for Your Mobile Workforce

Use Kaseya EndPoint Backup for endpoints and files that don't need to be on a traditional backup appliance. Use Kaseya EndPoint Backup alone or as a complement to Kaseya backup appliances.

EVERYTHING YOU NEED AT ONE SIMPLE PRICE

No matter what your employees or customers put on their laptops, backup is covered without any extra management or file selection from your end. Kaseya EndPoint Backup includes protection for workstations with up to 1TB of data, providing more than enough cloud backup for even the largest endpoints. Easily protect your remote servers too with automatic cloud backup for up to 1TB per server. Plus, there are no fees to access data or restore files either. No surprises. No gotchas. Just simple, cost-efficient endpoint backup.

End-User Productivity and Happy Customers

Protect critical data on Windows laptops and remote PCs, regardless of location. With simple backup to the Kaseya Cloud, setup is painless and data is safe and easily recovered.

Easy Cloud Backup for Remote Servers

Back up the files and folders on your remote servers without having to set up a local appliance or have on-site IT staff. Every server deserves cloud backup, especially when it's this easy.

Simple Deployment

Provide enterprise-class protection for endpoints and servers in minutes. Simply use your favorite endpoint management software to push agents to your entire fleet and start backing up endpoint data directly to the Kaseya Cloud.

Save Money, Reduce Complexity

Get data loss protection for endpoints and small remote servers without the need for local storage.

Restore Data Where You Need It

Initiate recovery from any location with an internet connection, including Wi-Fi, so no one needs to drive to the office. You can restore files to the original endpoint or server, or another machine running a Kaseya backup agent.
