

Get more from the Kaseya Platform with KaseyaOne

Managing multiple Kaseya products shouldn't mean managing multiple logins, portals, support experiences and billing tools

KaseyaOne brings together the services your team uses every day into one connected experience, helping your team simplify daily operations, access products faster and get more from the Kaseya Platform.

Whether you're a business owner, IT administrator, or technician, KaseyaOne simplifies how you access and manage the Kaseya Platform.

Everything you need to access and manage the Kaseya Platform

Access

- Single sign-on
- App Launcher
- Access Groups

Manage

- Billing and subscriptions
- Support
- Invoice Comparison

Learn

- Kaseya University
- Automations Hub
- Documentation and guides

Assist

- Get answers to billing and product questions
- Submit support tickets

Spend less time managing daily operations

Managing billing, subscriptions, support and learning resources across separate experiences creates unnecessary work.

KaseyaOne brings these operational services together in one place, making everyday account management faster and easier.

With KaseyaOne, your team can:

- Simplify everyday account management
- Get to support faster
- Improve visibility across billing and subscriptions
- Access more of the Kaseya services your team uses from one place

One login, one platform experience

Managing multiple credentials and switching between product portals slows technicians down and creates unnecessary friction throughout the day.

KaseyaOne provides one consistent way to access supported Kaseya products through a single login. This reduces portal switching and the need to authenticate separately across supported products.

KaseyaOne allows you to:

- Sign in once using your company's identity provider
- Launch supported Kaseya products from one App Launcher
- Manage user access through Access Groups
- Automatically provision users across supported products
- Spend less time switching between product portals

Set your team up for what's next

As the unified experience for the Kaseya Platform, KaseyaOne helps your organization adopt new capabilities faster as they become available.

Registering your entire team creates a consistent platform experience so everyone can benefit from new Kaseya capabilities as they're introduced.

Why it matters

- Give every user a consistent way to access Kaseya products
- Help technicians benefit from new platform capabilities sooner
- Standardize how your company interacts with the Kaseya Platform
- Prepare your organization as more experiences move into KaseyaOne

Who should use KaseyaOne?

Business owners

Manage billing and subscriptions from one place while giving your team a consistent platform experience.

IT administrators

Simplify user access with Access Groups, reduce onboarding effort and standardize platform access.

Technicians

Access products faster while reducing portal switching and quickly finding support and learning resources.

Get started

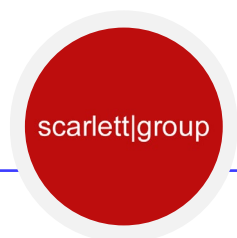

To get the most value from KaseyaOne:

- **Register** every user in your company, not just administrators
- **Configure** single sign-on using your company's identity provider
- **Connect** your supported Kaseya products to KaseyaOne
- **Make KaseyaOne** your team's primary way to access the Kaseya Platform
- **Explore** the growing set of capabilities available through KaseyaOne

Hear it from a KaseyaOne partner

"KaseyaOne allows us to access all of our Kaseya products under one roof. We can open support tickets, manage them and access training in one place. It's a one-stop shop to get in touch with Kaseya or manage our tools. It is also MUCH faster than it used to be."

Brian Drought
Director/Manager of IT Services, The Scarlett Group

Make KaseyaOne your team's home base

KaseyaOne is the unified experience for the Kaseya Platform. By making it the primary gateway for your entire team, you'll simplify daily operations, reduce access friction and be ready to take advantage of new platform capabilities as they become available.
