COMPLIANCE MANAGER

COMPLIANCE MANAGER FOR CMMC

The ultimate platform to help your clients prepare for and maintain compliance with the various cybersecurity standards required by the Department of Defense (DoD).

Prepare for Third-Party Audit

CMMC requires an independent Third-Party Assessment Organization (3PAO) to confirm your clients meet the requirements of each CMMC Level. Compliance Manager's built-in workflow automation engine walks you through the same steps that a third-party auditor will take to validate compliance with CMMC Levels 1-3 as well as NIST (SP) 800-171. Compliance data is gathered through a combination of automated network and computer data collectors as well as structured worksheets that are dynamically built as you go.

Generate Evidence of Compliance

As you undergo the assessment process for each individual control at each CMMC Level, you can systematically (and in some cases, automatically) upload your supporting documentation to speed up the audit process. For the 800-171 self-assessment, you will complete the DoD's official scoresheet. Once completed and scored, Compliance Manager will generate the required System Security Plan (SSP).

Produce Required Reports

Compliance Manager for CMMC automatically generates several interim questionnaires and worksheets, including an auditor's checklist, needed to complete your assessment. As a result, after you are certified, it is easier to regularly rerun your assessments and generate updated and prescriptive Management Plans to prove continuous compliance.

STAY AHEAD OF YOUR CLIENTS' NEEDS

If you have any clients who are a part of the Defense Industrial Base, even as a subcontractor several layers down, they need help with CMMC. Support them with Compliance Manager so they don't need to go elsewhere.

EXPAND YOUR MSP PRACTICE

There are more than 300,000 businesses that are part of the DoD's supply chain. Ask every prospect if they work on any DoD contracts, and if the answer is yes, take advantage of the opportunity by helping them prep for, and remain compliant with, CMMC. You don't need to be a CMMC expert with Compliance Manager!

CREATE NEW RECURRING REVENUE STREAMS

CMMC is just one of the many IT Security and Privacy standards that are included with the base Compliance Manager platform. Whether it is HIPAA, GDPR, the NIST Cybersecurity Framework, or every client's cyber liability insurance policy, Compliance Manager gives you diverse ways to create new recurring revenue streams from new and existing clients.
