

COMPLIANCE MANAGER FOR CMMC

The ultimate platform to help your organization prepare for, and maintain, compliance with the various cybersecurity standards required by the Department of Defense (DoD).

Prepare for Third-Party Audit

CMMC requires an independent Third-Party Assessment Organization (3PAO) to confirm that your organization meets the requirements of each CMMC Level. Compliance Manager's built-in workflow automation engine walks you through the same steps that a third-party auditor will take to validate compliance with CMMC Levels 1-3 as well as NIST (SP) 800-171.

Compliance data is gathered through a combination of automated network and computer data collectors as well as structured worksheets that are dynamically built as you go, saving you hundreds of labor hours.

Generate Evidence of Compliance

As you undergo the assessment process for each individual control at each CMMC Level, you can systematically (and in some cases, automatically) upload your supporting documentation to speed up the audit process.

For the 800-171 self-assessment, you will complete the DoD's official scoresheet. Once completed and scored, Compliance Manager will generate the required System Security Plan (SSP) and Plan of Action & Milestones (POAM).

Produce Required Reports

Compliance Manager for CMMC automatically generates several interim questionnaires and worksheets, including an auditor's checklist, needed to complete your assessment. As a result, after you are certified, it is easier to regularly rerun your assessments and generate updated and prescriptive Treatment Plans to prove continuous compliance.

STAY AHEAD OF DOD REQUIREMENTS

If you are a part of the Defense Industrial Base, even as a subcontractor several layers down, you need help with CMMC. Use Compliance Manager to get your network in order and minimize your risk of failure before requesting certification from a 3PAO.

DON'T RISK LOSING CONTRACTS DUE TO NON-COMPLIANCE

There are more than 300,000 businesses that are part of the DoD's supply chain vying for the latest contracts. Don't miss out on new contracts due to lack of CMMC compliance. Take advantage of the opportunity by helping yourself prep for, and remain compliant with, CMMC. You don't need to be a CMMC expert with Compliance Manager!

MEET MULTIPLE COMPLIANCE REQUIREMENTS WITH A SINGLE PLATFORM

Many organizations are required to meet multiple compliance standards and CMMC is just one of the many IT security and privacy standards that are included with the base Compliance Manager platform. Whether it is NIST Cybersecurity Framework, HIPAA, GDPR or your cyber liability insurance policy, Compliance Manager can help you achieve and maintain compliance across multiple standards.

Request a Demo today and discover the advantages of Compliance Manager -- the purpose-built compliance process automation platform for small to medium-size businesses.
