A purpose-built platform to manage everything associated with assessing and maintaining compliance with the EU General Data Protection Regulation (GDPR).

GDPR Compliance Made Easy

GDPR compliance doesn't have to be complicated. Compliance Manager walks organizations through a set of easy-to-understand questions, automatically scans to detect personal data, and creates all the documentation and reports you need to demonstrate compliance with GDPR.

GDPR-Approved Reports

Compliance Manager automatically formats the data it collects into GDPR-approved reports, including auditor checklists, Data Protection Impact Assessment (DPIA) and GDPR Evidence of Compliance.

Achieve Compliance and Avoid GDPR Fines

GDPR imposes strict fines for non-compliance; up to 4 percent of your global revenue or €20 million, whichever is larger. Compliance Manager takes the complexity out of GDPR and enables you to demonstrate continuous compliance, protecting you from these hefty fines.

STAY AHEAD OF AUDITORS AND GDPR REQUIREMENTS

If you collect or process the personal data of individuals located inside the European Union (EU), then you are subject to GDPR's strict regulations. Managing data collection, including opt-ins, opt-outs and deletion upon request, is only one small part of the regulation. However, with Compliance Manager by your side, you don't need to memorize all the details or be a compliance expert.

MITIGATE YOUR RISK AND EXPOSURE TO GDPR FINES

With such a wide net being cast, it's imperative you protect your organization from GDPR complaints and fines. Compliance Manager also includes an ISO 27001 questionnaire to address numerous other security regulations. In addition, while GDPR does not specifically apply to other countries or US states, many country and state privacy laws, such as Canada's PIPEDA, South Africa's POPIA and California's Consumer Privacy Act, have similar data privacy requirements that can be managed with the GDPR module. If you do business in those regions, Compliance Manager can be your all-in-one platform to maintain compliance.

MEET MULTIPLE COMPLIANCE REQUIREMENTS WITH A SINGLE PLATFORM

Many organizations are required to meet multiple compliance standards, and GDPR is just one of the many IT security and privacy standards that are included with the base Compliance Manager platform. Whether it is GDPR, HIPAA, CMMC, the NIST Cybersecurity Framework, or your cyber liability insurance policy, Compliance Manager can help you achieve and maintain compliance across multiple standards.

Request a Demo today and discover the advantages of Compliance Manager -- the purpose-built compliance process automation platform for small to medium-size businesses.
