

COMPLIANCE MANAGER FOR HIPAA

A purpose-built platform to help MSPs deliver ongoing HIPAA assessments and compliance reporting for their clients in the healthcare sector.

GUIDED HIPAA COMPLIANCE

The Compliance Manager platform helps MSPs address HIPAA issues, finds hidden ePHI on servers and computers, documents HIPAA policy and procedure validations, and generates all documentation required to adhere to HIPAA guidelines.

Produce Required Evidence of Compliance Documentation

Compliance Manager for HIPAA addresses the number one OCR-enforced violation by producing an “accurate and thorough” Risk Analysis, Management Plan, comprehensive Policy and Procedures and other required documentation. The “under the skin scan” automatically generates dynamically built questionnaires and pre-filled security worksheets, including an auditor’s checklist, needed to complete your assessment. Once the initial assessment is completed and all required documentation is produced, Compliance Manager automatically rescans the environment on a recurring basis, identifying and alerting on any new risks, as well as generating change summary reports that address the HIPAA continuous improvement requirement.

Achieve Compliance and Avoid HIPAA Violations

Smaller businesses tend to have fewer resources at their disposal, seem less up to date on regulation requirements and less aware of the substantial non-compliance risks and penalties involved. However, ignorance is not an accepted excuse. Organizations can also be fined for “willful neglect” — where they knew they had an obligation to comply and yet failed to take proactive measures.

STAY ON TOP OF YOUR CLIENTS' NEEDS

If you have any clients in the healthcare sector that are Covered Entities or their Business Associates, they will need help complying with HIPAA regulations. With Compliance Manager by your side, you don't need to be a compliance expert to help them.

EXPAND YOUR MSP PRACTICE

Working with healthcare clients might seem challenging but the potential opportunity is huge and should not be overlooked. The healthcare market is ever-growing and presents numerous lucrative revenue channels for a savvy MSP looking to ensure its healthcare clients stay ahead of the curve.

CREATE NEW RECURRING REVENUE STREAMS

HIPAA is just one of a growing number of IT Security and Privacy standards that are included with the base Compliance Manager platform. Whether it's GDPR, CMMC, the NIST Cybersecurity Framework, or every client's cyber liability insurance policy, Compliance Manager gives you many ways to create new recurring revenue streams from new and existing clients.
