

# AuthAnvil Enterprise Identity

Simple, Affordable Access and Identity Security

Go beyond passwords. Quickly secure access to your business' applications and systems — no matter how many users or where they are logging in from — with multi-factor authentication and Single Sign-On (SSO) services from Kaseya.

## One level of security is no longer enough

Password-related breaches are the leading cause of data loss for organizations. While passwords may not disappear, it's clear that companies of all sizes need to go beyond passwords to secure their end users' access to business applications and systems. This need is only getting more urgent as companies increasingly adopt cloud applications and more users work remotely.

What if you could increase security while also making life significantly easier for your end users?

You can with AuthAnvil Enterprise Identity.

## Simple. Seamless. Secure.

### Complete Identify and Access Management

AuthAnvil Enterprise Identity delivers modern, simple Identity and Access Management (IAM) for 2 users or 2,000 — at a highly affordable price.

**Multi-Factor Authentication (MFA).** MFA both strengthens security with credentials that are virtually impossible to steal and makes life easier for employees by not requiring them to remember extremely complex passwords.

**Single Sign On (SSO).** With AuthAnvil's SSO functionality, your users can access the applications, websites, and cloud services they need for the day with a single login. Combined with the security of MFA, SSO not only eliminates the problem of weak passwords, but also increases your users' productivity.

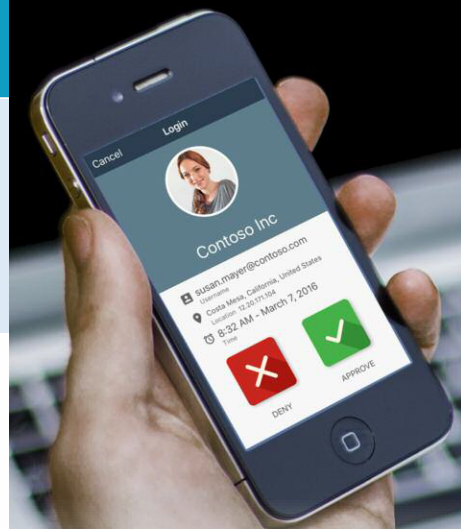

Better yet? With MFA and SSO, there are virtually no calls to your support staff to reset passwords!

## Customizable User Experience

You have total control and flexibility to set up AuthAnvil Enterprise Identity so that it supports your own unique security and access requirements.

**Advanced Policy Management:** You determine what authentication is required and when to require it. You can manage policies at user, group and company levels.

**Flexible MFA Access:** Our best-in-class authentication experience allows you to determine which options users can use to prove their identity — push-notifications, one-time passwords, and even the new Universal Second Factor (U2F) devices.

## KEY BENEFITS:

### Secure Access

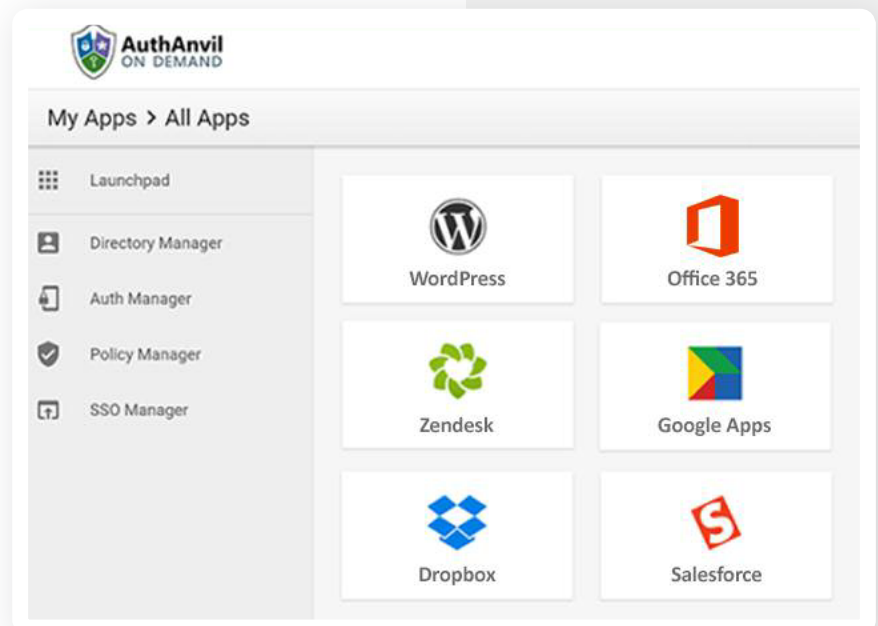

Protect your critical systems and data.

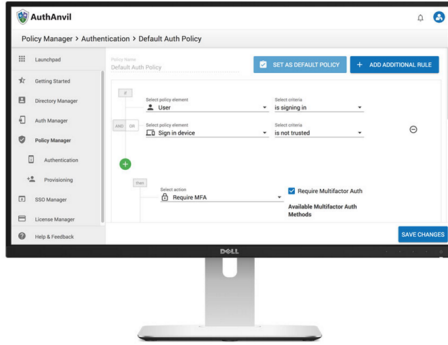

### Simplicity

Get started in minutes, not hours or days.

### Affordability

Enterprise-level product functionality at a fraction of the cost of other solutions.

## Universal Directory Integration:

Synchronize with your existing Active Directory infrastructure and leverage it in the cloud. Keep all users, groups, and computers in sync as defined by your administrator.

## Just-in-time Rollouts:

AuthAnvil Enterprise Identity allows you to enroll users quickly and easily. Adding or removing users is as simple as clicking a mouse.

**Real-time Security Reporting:** AuthAnvil Enterprise Identity monitors and records all user login activities and the applications they access. Compliance and auditing requirements are easily managed and reported on.

## Pricing

Stay within your budget while getting top-of-the-line security. AuthAnvil Enterprise delivers sophisticated functionality at a fraction of the cost of other solutions.

Pricing begins at \$250/month for up to 500 employees.

## 2FA

Enterprise-class two-factor authentication. An Exceptional value.
