

Kaseya 365 Ops

Empowering top IT performance through AI-driven workflows and automated reporting

Overview

Kaseya 365 Ops integrates business operations with IT execution, empowering IT teams to reach peak performance. By harnessing AI-driven workflows and unified reporting, it enables teams to boost efficiency, prove their value and scale like never before.

50+
workflow automations

Fueled by AI

Achieve operational excellence with automation and AI

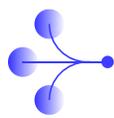

Being technically proficient is a requirement for success, but what sets top IT teams apart is streamlined operations. Kaseya 365 Ops unifies IT execution and business operations through Cooper Copilot AI and 50+ deep integrations, so your team can perform at their peak without added complexity or cost.

Leverage AI-powered workflows

Supercharge your technicians with more time and zero error.

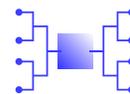

Enhance team performance

Demonstrate strategic value

Spotlight the quality of your work to leadership and budget owners.

Protect your budget

Eliminate blind spots

Gain visibility by tracking and automating key business practices.

Increase visibility

What's included?

Kaseya 365 Ops equips you with all the IT operations tools needed to deliver optimal, integrated services across every environment.

Function	Module	Description
 IT service management	Autotask or BMS	Centralize ticketing, project management and scheduling in one unified solution.
 IT asset and knowledge management	IT Glue	Secures and organizes IT assets, passwords and SOPs for faster, more consistent services.
 IT asset lifecycle and Reporting	myITprocess	Track asset lifecycle and warranty status while automating reports to showcase IT's impact and justify budget.
 End-user password management	MyGlue	Give end-users a secure, easy-to-use password management tool that encourages safe practices.
 Network discovery and password rotation	Network Glue	Discover devices, map networks, and rotates passwords automatically to improve security and visibility.
 IT procurement	Kaseya Quote Manager	Simplifies IT purchasing with real-time pricing, stock visibility, and automated PO workflows.
 Subscription management*	ConnectBooster	Automate recurring revenue billing to ensure accurate, secure and timely payments.

*Included at no additional cost with Kaseya 365 Ops to support partners operating on a recurring revenue model.

How top performing IT teams win

"IT Glue is like the IT bible for me; I can't do anything without it."

Scott Cloy, CISO, Savadge Networking Solutions

"Switching to Kaseya's IT operations platform flipped our workflow upside down — in the best way possible. A task that used to take 10 minutes now takes one. That's impact."

Koby Dudley, Director of Managed Services, BECA

"We switched to Autotask and the migration was much easier than expected. Our team adopted it quickly and ticket resolution has improved by 40%."

Amber Moore, Director of Managed Services, Pioneer 360
