Kaseya Products:

Kaseya® VSA™

Overcome IT complexity and manage your entire IT environment to improve service quality, increase efficiency, and deliver new services rapidly and securely. Kaseya VSA is a comprehensive IT management solution that allows IT departments and Managed Service Providers (MSPs) to centrally manage and automate all of IT, from a single console.

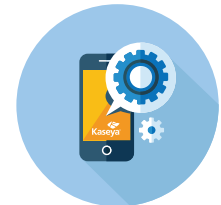

Kaseya® AuthAnvil™

Secure your company's most valuable asset – its data – by minimizing the risk of password-related security breaches and making password management easier and much more efficient. Kaseya AuthAnvil is the only offering which integrates single sign-on, multi-factor authentication and password management into a single solution.

Kaseya® EMM™

Secure all mobile devices used to access corporate resources, whether company-owned or employee-owned, from a single pane-of-glass. Kaseya Enterprise Mobility Management (EMM) combines powerful capabilities for Bring Your Own Device (BYOD) Management, Mobile Device Management (MDM), and Mobile Application Management (MAM) in a single solution.

Kaseya® 365 Command™

Improve the security of your Microsoft® Online Services information and simplify the management of permissions and settings for all users, mailboxes, emails and files. The intuitive user interface of Kaseya 365 Command removes the complexity of administering and maintaining your Office 365™, SharePoint™ cloud and OneDrive™ applications.

Kaseya® Traverse™

Monitor, measure and proactively manage service levels, and align IT services with the business processes they support. Kaseya Traverse provides real-time visibility into the performance of virtualized IT services as well as rapid root-cause analysis, leveraging advanced heuristics to maximize service availability.
