

Kaseya Compliance Manager - Compliance Process Automation Built into Kaseya VSA

Kaseya Compliance Manager is your process automation platform for GDPR, HIPAA, and Cyber Insurance.

SIMPLIFY COMPLIANCE

The first and only purpose-built, role-based compliance process automation platform, Kaseya Compliance Manager embodies the characteristics of your compliance assistant who works 24x7.

Kaseya Compliance Manager combines a wizard-driven workflow engine, automated network and computer data discovery, a web-based management portal, and built-in compliance document generation—to help you maintain and prove compliance.

KASEYA COMPLIANCE MANAGER BUILT INTO VSA

Kaseya Compliance Manager, an add-on to VSA, allows you to leverage your current investment and expand its capabilities to audit and document compliance from a single pane of glass.

CORE FEATURES:

- ✔ **Automated Assessments:** Automates compliance assessments by scanning your public and internal environments and determines if all compliance requirements are met.
- ✔ **Risk-Based Remediation:** Kaseya Compliance Manager, along with VSA, provides ongoing remediation documentation.
- ✔ **Demonstrable Compliance:** Generates richly detailed reports that document the compliance activities of your organization which can be provided to regulators, auditors and other compliance stakeholders.

HOW KASEYA COMPLIANCE MANAGER ASSESSMENTS WORK:

🚩 Standardization of the Internal Assessment Mythology

Our approach to compliance walks you and your stakeholders through the process in a repeatable and non-arbitrary way that will stand-up to auditor scrutiny.

🚩 Role-based Assignments

Divides the workloads into four primary roles, so that the appropriate department and personnel are responsible for their part of the assessment process.

🚩 Automatic Data Validation

Kaseya Compliance Manager automatically compares the assessment data provided by the department with the information it has gathered and highlights exceptions where they do not match.
