

# COMPLIANCE MANAGER FOR HIPAA

A purpose-built platform to help Covered Entities and Business Associates manage their ongoing HIPAA assessments and compliance reporting through an automated data auditing, validation and report generation platform.

## GUIDED HIPAA COMPLIANCE

The Compliance Manager platform helps organizations address HIPAA issues, find hidden ePHI on servers and computers, document HIPAA policy and procedure validations, and generate all documentation required to adhere to HIPAA guidelines.

### Produce Required Evidence of Compliance Documentation

Compliance Manager for HIPAA addresses the number one OCR-enforced violation by producing an “accurate and thorough” Risk Analysis, Management Plan and other required documentation. The “under the skin” scan automatically generates dynamically-built questionnaires and pre-filled security worksheets, including an auditor’s checklist needed to complete your assessment. Once the initial assessment is completed and all required documentation is produced, Compliance Manager automatically rescans the environment on a recurring basis, identifying and alerting on any new risks. It also generates change summary reports that address the HIPAA continuous improvement requirement.

### Achieve Compliance and Avoid HIPAA Violations

Small to mid-size businesses tend to have fewer resources at their disposal, seem less abreast of regulation requirements, and less aware of the substantial non-compliance risks and penalties involved. However, ignorance is not an accepted excuse. Organizations can also be fined for “willful neglect” - where they knew they had an obligation to comply and yet failed to take proactive measures. Why take the risk when there’s a simple, cost-effective way to achieve and maintain compliance with HIPAA guidelines?

#### STAY ON TOP OF HIPAA REQUIREMENTS

If your organization is a Covered Entity or a Business Associate in the Healthcare sector, you will need help complying with HIPAA regulations. With Compliance Manager by your side, you don't need to be a compliance expert to follow HIPAA guidelines.

#### DON'T RISK YOUR BUSINESS OR EXPOSE YOURSELF TO FINES BY IGNORING HIPAA

HIPAA is the law, and the Office for Civil Rights (OCR) has recently made it a point to go after small providers. A single doctor was recently fined \$100,000 for failing to produce an “accurate and thorough” Risk Analysis. Seventy percent of patients said they would consider leaving their provider in the event of a data breach, and trial lawyers are lining up to sue Covered Entities and Business Associates who expose their patients’ data to the Dark Web. Compliance Manager can help you follow HIPAA guidelines and mitigate your risk.

#### MEET MULTIPLE COMPLIANCE REQUIREMENTS WITH A SINGLE PLATFORM

Many organizations are required to meet multiple compliance standards, with HIPAA being just one of many IT security and privacy standards that are included with the base Compliance Manager platform. Whether it is the NIST Cybersecurity Framework, GDPR, CMMC or your cyber liability insurance policy, Compliance Manager can help you achieve and maintain compliance across multiple standards.
